

OPEN QUICKBOOKS IN SAFE MODE

QuickBooks software is already safe and secure software for accounting purposes. Many users use this software without taking any stress and making their accounts freely.

It's not that users don't face problems while using QuickBooks.

How to Open QuickBooks in Safe Mode?

1. Start, your system, and run the command form, by pressing the 'Ctrl+R' key from the keyboard.
2. Enter 'Msconfig' on the command form, and click the 'Ok' option.
3. Go to the 'General' option, and select the startup selection.
4. Then, go to the 'Services' tab, and check mark on the 'Hide all Microsoft Services' option.
5. Disable all the alternatives, and select the 'Cover all the Microsoft provider' checkbox to clear it.
6. Click 'Ok', and restart the system configuration window.
7. Set up QuickBooks, and run the command form again.
8. Again enter 'Msconfig'.
9. Click on the 'Normal Startup' option from the 'General' tab.
10. Then, click 'Ok'. Lastly, restart your system.

**IT'S TIME TO TAKE
ACTION!**

There are so many ways you can this procedure.
